Zeder Naval Shipyard

50X1-HUM

50X1-HUM

- The Zadar Naval Shipyard is reported to be under the direct control and jurisdiction of the General Directorate of Shipyards in the North Adriatic, Rijeka, responsible to the Central Directorate of Naval Construction, within the Ministry of National Defense, Belgrade.

 A Military Commission composed of an unspecified number of first lieutenants and other higher-ranking Navy officers, is purportedly located within the Zadar Naval Shipyard. Last year four large vessels for tuna fishing were reportedly constructed at the Shipyard. At the present time, the following construction projects are allegedly in progress at the Zadar Naval Shipyard:
 - a. An unspecified number of wooden vessels for the Yugoslav Navy, on which approximately 500 persons are engaged;
 - b. Five ships of the MCA type have reportedly already been launched and are moored in the Shipyard awaiting installation of engines and fittings. In three of these vessels the command bridge was situated toward the stern and in the remaining two, the command bridge was located near the prow; and
 - G. Four more ships of the KQCA type are almost ready for launching. All nine of these ships are being constructed for the Yugoslav Mavy and will purportedly be used simultaneously for mine laying and mine sweeping.
